Macro Economic Review

The Global economy experienced a bit of growth scare in August when the U.S. unemployment rate rose above expectations. The Chinese economy remains sluggish as consumer confidence continues to be low and property sector suffers. The European economy has remained steady as inflation has cooled down and helped consumption. The Indian economy remains robust with improving rural demand and strong real estate cycle, although urban consumption and manufacturing growth have softened a bit.

The U.S. economy suffered a growth scare in August as the unemployment rate rose to 4.3% from a low of 3.4% a year earlier. Manufacturing PMIs remained contractionary while services PMI remained steady. Retail sales rebounded from the earlier month with broad strength. Initial jobless claims remained steady. Inflation appears to be steady with core CPI at 3.2% YoY compared to 3.3% in the previous month.

India's GDP growth for the June quarter was 6.7% YoY. Private final consumption expenditure (PFCE) grew by 7.45% YoY. Government final consumption expenditure (GFCE) declined by 0.2% YoY. Gross fixed capital formation (GFCF) grew by 7.5% YoY. GVA growth remained strong at 6.8% YoY, led by services growth at 7.2% YoY and construction growth at 10.5% YoY. Manufacturing growth remained healthy at 7% YoY. Agricultural GVA growth was low at 2% YoY.

India's CPI for July dropped to 3.54% from 5.08% in the previous month, largely due to a high base from the previous year. Food inflation continued to remain high with a 2.5% MoM increase driven by high vegetable, cereal, and pulses inflation. Core inflation jumped to 3.37% compared to 3.15% in the previous month due to the telecom tariff hike. With the monsoon progressing well, expectations are for food inflation to cool down from these levels.

The Manufacturing Purchasing Managers' Index (PMI) for August remained strong at 57.5 compared to 58.1 in the previous month. New orders remained strong, but exports showed softness. The Services PMI continued to remain strong at 60.9 compared to 60.3 in the previous month with strong domestic orders. The index of eight core industries rebounded and grew by 6.1% YoY in July compared to 5.1% in the previous month, with broad-based growth across almost all industries. Bank credit growth slowed in August, growing by ~14% YoY.

India's trade deficit for July was USD 23.5 billion compared to USD 21 billion in the previous month. Exports declined by 1.5% YoY, with petroleum exports falling by 22% YoY. Imports increased by 7.5% YoY due to higher petroleum imports and steady other imports. The net services surplus remained steady at around USD 13.9 billion compared to USD 13.8 billion in the previous month. FX reserves as of the week ending 23 August were USD 682 billion, up USD 12 billion from the end of the previous month.

The Central Government's gross fiscal deficit (GFD) up to July 2024 touched 17.2% of its annual budgeted target. At the same time last year, the government had exhausted 33.9% of its annual deficit target. Expenditure decreased by 5.8% YoY during April-July 2024 as government capex spending slowed before elections. On the revenue side, net tax collections increased by 22.8% YoY compared to April-July of last year. The government collected INR 1.75 trillion in GST in August 2024 compared to INR 1.82 trillion in the previous month.

Overall domestic demand and activity levels remain healthy as the investment cycle remains firm and rural demand is improving. Core inflation has been steady, and with the good monsoon season, food prices are likely to soften, helping to cool overall inflation. Global growth seems to be softening and will need to be watched for spill-over effects to India.

Equity Market Outlook

Indian markets fell sharply at the beginning of the month after a weaker-than-expected US employment data, a sell-off in Japan and geopolitical tensions in the Middle East but stabilized towards the end with Nifty-50 Index gaining 1%. Mid and Small cap indices were up 0.5% and 0.9% respectively. Sectoral indices ended on a mixed note with healthcare (+7%), consumer durables (+4%) and IT (+4%) were the major gainers, whereas PSU (-4%), realty (-4%) and capital goods (-3%) were the major losers. Globally, Brazil, Indonesia and the Philippines gained 6.5%, 6% and 4%. South Korea, Shanghai and Mexico declined 3.5%, 3% and 2%. Other key developments: (1) Bank of Japan said that the central bank would not hike interest rates when markets are unstable, (2) the India government proposed that indexation benefits will be restored for immovable property bought before July 23, 2024, (3) the RBI maintained status quo on interest rates for the ninth consecutive time, (4) the Supreme Court allowed states to levy tax and royalty on minerals, apart from central duties, and collect past dues, (5) the Federal Reserve Chair's comments reinforced expectations of a rate cut in September, (6) Real GDP growth in 1QFY25 eased to 6.7% compared to 7.8% in 4QFY24, (7) Fitch affirmed India's rating at 'BBB-' with a stable outlook and (8) FPIs bought US\$ 0.9bn of Indian equities in the secondary market, whereas DIIs bought US\$5.8 bn.

Q1FY25 earnings season: The effect of elections, heatwave and stable commodity prices was visible in earnings in the latest earnings season. 1QFY25 results of BSE-500 companies show that revenue growth has moderated at 8% YoY on aggregate and 9% YoY ex-OMCs. EBITDA of non-financial companies of this universe increased a modest 1% YoY (16% YoY ex-OMCs), while PAT increased 3% YoY (11% YoY ex-OMCs).

High-frequency data for August recorded growth in sequential terms after declining for three consecutive months, while it grew at a slightly slower pace on a YoY basis. GST collection growth remained largely steady at 10% YoY; credit growth (adjusted for HDFC merger) slowed to 13.6% YoY in Aug. Within auto sales, while two-wheelers rose at a faster pace, passenger vehicles declined at a softer rate on a YoY basis in Aug. While manufacturing PMI softened to 57.5 (58.1 in July), Services PMI rose to a 5-month high of 60.9, remaining above 60 in CYTD24 on the back of expanding business activity and new orders. Air passenger traffic moderated in YoY terms but improved on a sequential basis. Consumer sentiment improved sequentially.

As such, within consumption, we see rural demand picking up as indicated by 1) rural FMCG volumes outpacing urban, as reported by Nielsen; 2) improvement in two-wheeler sales; 3) favourable monsoon trends (8% above long period average) and

kharif sowing (up 1.9% YoY), 4) moderating inflation; and 5) anecdotal commentary from large FMCG firms. In addition, recovery in private capex is likely to gain strength as seen from 1) improving investment intentions, 2) rising investment announcements across sectors such as semi-con, air conditioners, power, 3) increasing order books – and is thus likely to support the robust trend in public and household capex.

Indian markets continue to respond well to ongoing strength in macro-conditions. In recent weeks, the brightening prospect of a cut in interest rates globally and perhaps in India and weakening oil prices have further added shine to the markets. Recent correction in commodity prices is heartening and takes away some of the risk to corporate earnings, however this is an area that needs careful monitoring. Upcoming state elections, the outcome of the US elections and any other geo-political event remain key variables that can induce volatility in the market as they can have implications for global growth and domestic economic policies. While we take a sanguine view of the domestic economic cycle, we acknowledge that the market cycle is quite ahead of the economic cycle. The steady upward march of the market therefore poses risk of possible sharp pullbacks. This may lead to market returns compressing as we walk into the remainder of this calendar year.

Notwithstanding such short-term aberrations, we find India's current aggregate positioning in the global economic cycle very attractive and remain convinced of a strong domestic investment and consumption opportunity unfolding over the next few years. This will provide adequate compounding investment opportunities for investors. Intermittent corrections, particularly those caused by global factors should be used to enhance overall return outcomes.

Fixed Income Market

US treasury yields continued its declining trend across the curve as more than expected worsening of unemployment rate triggered market expectations of aggressive rate cuts by FOMC. However, rate hike by Bank of Japan created heightened volatility across global financial markets.

Domestic G-sec yields also rallied across the curve by 5-7 bps with bull steepening bias. While the benign global backdrop and domestic inflation which came better than expected at 3.54% were positive for the rates, elevated supply on SDL and RBI's surprise exclusion of new 15 yr and 30 yr G-Sec benchmark from FAR security dented the sentiment. Corporate bonds underperformed the G-Sec especially in the short end and corporate bond yield curve remains inverted. Domestic banking liquidity remained in surplus, however money market rates remained high on elevated supply.

Outlook

Many key Central banks have already started the rate cut as inflation moderates amidst growth slowdown. US's FOMC is also set to begin the rate cut cycle in September, quantum of which will depend upon the incoming data on US's jobs market. FOMC's September meeting will also be closely watched upon by market participants for future rate guidance as any sharp worsening of job's market may prompt FOMC to indicate aggressive rate cuts over next few months. Even as global monetary policies turn favourable, global volatility in financial assets may remain elevated as US presidential election unfolds.

Contrary to many other global Central banks, RBI continues to maintain its caution on domestic headline inflation and has not given any rate cut expectations in near future. In our view, MPC may take cognizance of 1QFY25 GDP slowdown to 6.7% as against RBI's projections of 7.1% along with healthy pickup in monsoon which is expected to provide relief to the elevated food inflation. Further, with global backdrop turning favorable, MPC may moderate its hawkish tone in upcoming October monetary policy providing a positive impetus to market. We believe that RBI will be able to get better clarity by CY 2024 end in terms of domestic food inflation and if the global uncertainties recede by then, MPC may look to pivot towards the commencement of rate cut cycle.

Even as domestic rate cut cycle is sometime away, onset of global rate cut cycle & extremely favorable domestic demand-supply dynamics bodes well for local rates. G-Sec demand supply is favorable not only in FY25 on the back of JP Morgan debt index inclusion but also in FY26 as Government has committed to further consolidate fiscal deficit below 4.5% in FY26. FPIs have bought more than Rs. 60,000 crs G-sec since June 2024, surpassing market expectations. Reduction of T-bill supply and cash drawdown of Rs 1.4 lakh crores by Government to fund fiscal deficit in FY25 is beneficial for the short end of yield curve.

Overall, **risk-reward remains favorable** at current juncture with benign fundamentals & elevated yields across the yield curve. Short end of the yield curve is expected to see a downward movement over next couple of months with improving banking liquidity. Longer end of the yield curve is expected to remain supported on the back of favorable demand-supply dynamics. Any uptick in yields due to still evolving global factors and unfolding global political landscape should be seen as an opportunity to build further exposure as the rate cut cycle commensurate over next few months.

Fund P/E - FY25E is current price to earnings for FY25E, Fund P/B is 12 months trailing price to book value. Both are arrived at using Weighted Harmonic Mean which is an average resulting from the multiplication of the reciprocal of the observation for each component by the weightage of that stock in the portfolio/index. For 1,2,5, and related disclaimer / notes, refer page no. 55.

IDCW - Income Distribution cum capital withdrawal option.

This product is suitable for investors who are seeking*:

- Income over medium-term
- Income through opportunities emerging out of difference in pricing between cash and derivatives markets and through deployment of surplus cash in fixed income instruments.

***Investors should consult their financial advisers if in doubt about whether the product is suitable for them.**

Notes

Returns 1 year and above are Compounded Annualised Growth Rate (CAGR). Returns less than 1 year are Simple Annualized. Inception date is deemed to be date of allotment. Invesco India Manufacturing Fund has not completed 6 months, hence performance data is not provided.

Note for Direct Plan : The date of allotment for Direct Plan is January 1, 2013 for all schemes except Invesco India Credit Risk Fund. (i) Applicable to all schemes except Invesco India Credit Risk Fund and Invesco India Liquid Fund : For calculating returns since inception for Direct Plan, NAV as on January 1, 2013 of corresponding Growth Option of Existing Plan is considered. (ii) Applicable only to Invesco India Liquid Fund : For calculating returns since inception for Direct Plan, NAV as on December 31, 2012 of corresponding Growth Option of Existing Plan is considered.

Returns for Invesco India NIFTY 50 Exchange Traded Fund are calculated after considering Reinvestment of Income Distribution cum capital withdrawal option of ₹ 5 per unit on record date - December 26, 2012 at ex-IDCW NAV of ₹ 591.3176 per unit. For calculating returns since inception of all schemes except open ended debt schemes, Invesco India Gold Exchange Traded Fund and Invesco India NIFTY 50 Exchange Traded Fund, NAV as on the date of allotment is taken as ₹ 10/-. For calculating returns since inception for Invesco India Gold Exchange Traded Fund, NAV as on the date of allotment is taken as ₹ 1,680.0014 and for Invesco India NIFTY 50 Exchange Traded Fund, NAV as on the date of allotment is taken as ₹ 548.28. For calculating returns since inception for open ended debt schemes NAV as on the date of allotment is taken as ₹ 1,000/-. Face Value per unit is ₹ 10/- for all schemes except for open ended debt schemes and Invesco India Gold Exchange Traded Fund where Face Value per unit is ₹ 1,000/- and ₹ 100/- respectively.

* Invesco India Arbitrage Fund performance is not strictly comparable with that of its additional benchmark since the scheme does not take directional call in equity markets but is limited to availing arbitrage opportunities etc.

The upfront commission, if any, on investment made by the investor shall be paid by the investor directly to the Distributor, based on his assessment of various factors including the service rendered by the Distributor.

¹Exit load charged, if any, will be credited back to the scheme, net of goods & services tax.

²Includes goods & services tax on management fee accrued and additional TER charged on account of inflows from beyond top 30 cities, wherever applicable.

^{2a}Excluding total recurring expense charged by the Underlying Fund.

⁴YTM : Yield to maturity should not be construed as minimum return offered by Scheme.

⁵Estimate (E) - The information provided herein may include statements/data of future expectations that are based on current views and assumptions and involves known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied.

Note on Direct Plan : Pursuant to provisions of para 2.5 of SEBI Master circular dated June 27, 2024, a separate plan for direct investments (i.e. investments not routed through Distributor) under all Schemes of Invesco Mutual Fund (except Exchange Traded Funds) was introduced with effect from January 1, 2013. Direct Plan under Invesco India - Invesco Pan European Equity Fund of Fund, Invesco India - Invesco Global Equity Income Fund of Fund and Invesco India Credit Risk Fund is available since inception. Direct Plan will have a lower expense ratio excluding distribution expenses, commission for distribution of Units etc.

Note on Exit Load Structure for Switch to & from Direct Plan within the Scheme : There will be no exit load for switch between the plans under the scheme i.e. Regular Plan / Existing Plan to Direct Plan and vice versa. (w.e.f March 9, 2020). Applicable to all Schemes, except Invesco India ELSS Tax Saver Fund, Invesco India Gold ETF, Invesco India Nifty ETF and Invesco India Overnight Fund.

Note Applicable to IDCW Distribution : The IDCW distribution table includes details of past 3 IDCWs declared and does not include details of all the IDCWs declared in the scheme(s) since inception, wherever applicable.

The investors are advised to refer to the Scheme Information Document for the full text of Disclaimer Clause of BSE Ltd.

How to read Fact Sheet

Fund Manager : An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.

Application Amount for Fresh Subscription : This is the minimum investment amount for a new investor in a mutual fund scheme.

Minimum Additional Amount : This is the minimum investment amount for an existing investor in a mutual fund scheme.

Yield to Maturity : The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.

SIP : SIP or systematic investment plan works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹ 500 every 15th of the month in an equity fund for a period of three years.

NAV : The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses. The NAV is calculated at the end of every business day. It is the value at which the investor enters or exits the mutual fund.

Benchmark : A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the Nifty, Sensex, BSE 200, BSE 500, 10-Year Gsec.

Entry Load : A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹ 100 and the entry load is 1%, the investor will enter the fund at ₹ 101.

Note : Para 10.4 of SEBI Master circular dated June 27, 2024 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor.

Exit Load : Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is deducted from the prevailing NAV at the time of redemption.

The investor will receive redemption proceeds at net value of NAV less exit load. For instance, if the NAV is ₹ 100 and the exit load is 1%, the investor will receive ₹ 99.

Macaulay Duration : Macaulay duration of a bond is the number of years taken to recover the initial investment of a bond. It is calculated as the weighted average number of years to receive the cash flow wherein the present value of respective cash flows is multiplied with the time to that respective cash flows. The total of such values is divided by the price of the security to arrive at the duration.

Modified Duration : Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.

Standard Deviation : Standard deviation is a statistical measure of the range of an investment's performance. When a mutual fund has a high standard deviation, it means its range of performance is wide, implying greater volatility.

Sharpe Ratio : The Sharpe Ratio, named after its founder, the Nobel Laureate William Sharpe, is a measure of risk-adjusted returns. It is calculated using standard deviation and excess return to determine reward per unit of risk.

Beta : Beta is a measure of an investment's volatility vis-à-vis the market. Beta of less than 1 means that the security will be less volatile than the market. A beta of greater than 1 implies that the security's price will be more volatile than the market.

AUM : AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund or any investment firm.

Holdings : The holdings or the portfolio is a mutual fund's latest or updated reported statement of investments/securities. These are usually displayed in terms of percentage to net assets or the rupee value or both. The objective is to give investors an idea of where their money is being invested by the fund manager.

Nature of Scheme : The investment objective and underlying investments determine the nature of the mutual fund scheme. For instance, a mutual fund that aims at generating capital appreciation by investing in stock markets is an equity fund or growth fund. Likewise, a mutual fund that aims at capital preservation by investing in debt markets is a debt fund or income fund. Each of these categories may have sub-categories.

Rating Profile : Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.
